How Silver Technology Kills Pathogens

First Line of Defense ~ A crystalline Barrier Nuturell has designed a natural mechanism within the formulation that creates a positive crystalline barrier that draws the microbial life forms to itself and punctures the cell wall that will cause the pathogens to bleed out and die; this process is considered a mechanical kill.

Second Line of Defense ~ Silver Technology Nuturell's Silver technology will block the bacterial respiratory system and thereby destroy the energy production of the cell. In the end, the bacterial cell membrane will burst, and the bacteria will be destroyed; another form of a mechanical kill. **Description Steps of Pathogen Death** 1) The Silver Ions (Ag+) bind to the pathogens cell wall; blocking transportation of RNA to and from the cell. 2) Silver technology attacks the respiratory system of the pathogen; destroying the energy of production. 3) Within the cell wall of the bacteria the silver technology terminates all cell division which prevents pathogen replication.

DETAILED EXPLANATION The Nuturell product is composed of Silver Nano's, Inert Salts, Water and an Inert Charged substance that forms a protective shield that maintains an 14 day efficacy that keeps on killing until the inert charged substance is worn down.

New Covid variant *Omicron*

The new **Omicron variant** is another form of the SARS CoV-2 coronavirus viral, with a crown-like spike protein structure giving its name. Virologists and Epidemiologists have detected and identified this new variant as B.1.1.529.

This variant has a large number of mutations, some of which are very concerning. Preliminary evidence suggests an increased risk of reinfection with this variant, as compared to previous mutations. The number of cases of this variant appears to be increasing in almost all provinces in South Africa. Current SARS-CoV-2 PCR diagnostics continue to detect this variant.

Nuturell Surface Shield's clinically proven formula is 99.9% effective against the Human Coronavirus oc43. Unfortunately, despite numerous existing worldwide distribution of coronavirus vaccinations and boosters shots, along with potent antivirals and antibiotics, and other antimicrobial means, these new virals and their variants are still a significant cause of morbidity and mortality in the world today.

Nuturell developed a unique silver ion-based solution chemically free that will eliminate all forms of pathogens without any chemical resistants from these new variants because the technology is based upon a mechanical and not chemical kill. Pathogens build up chemical-resistant a natural immunity from these harsh and dangerous chemicals that man has been able to create; this is a massive concern for the future of humanity.

In my humble opinion, I believe that Nuturell Surface Shield is the only way to kill and destroy current forms of the SARS CoV-2 Viral and its variants.

NON-TOXIC SURFACE SHIELD

HISTORICAL TIMELINE & PRODUCT ANALYSIS

November 18th 2020

Historical Timeline of Product

2014 – Product developed for the military to allow OUR forces to combat Ebola. The product effectively kills the viral pathogen while maintaining a shielded area for operational forces to function without being infected.

2019 – Product is authorized to be disseminated for public use due in part to the H1N1 and SARS related infections.

2020 – EPA filing occurred with the sole purpose of allowing the use of the word Disinfectant on the label. Reprinted for you is what the current status is:

CURRENT PRODUCT EPA STATUS

The EPA has awarded Nuturell:

Naturell is an approved EPA Establishment ~ 97456-DE-1 Database posted Listing.

Naturell is a registered product ~ 97456-R

Naturell doesn't have a designation to an EPA Approved List ~ N, L

Product Statement

I have a full understanding of this amazing technology and how it works, but for the likes of it, how the silver nano particles remain suspended evenly throughout the liquid is technology that is highly guarded. In fact; it needs to remain with Naturell indefinitely.

With the current state of affairs on this planet, viral's and pathogens created to interfere with sovereignty's ability to function unimpeded is a serious matter.

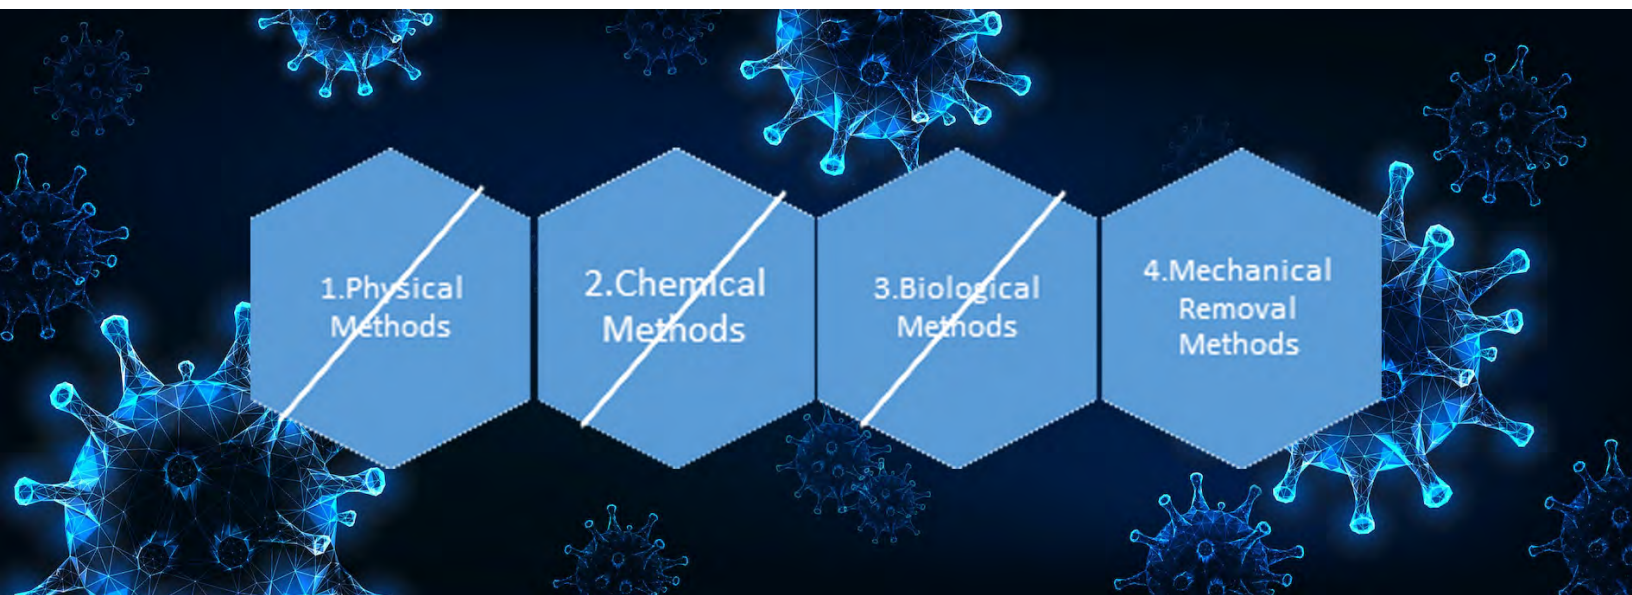

This brings to light the most important aspect of this product!

100% Chemical Free Formula

Non-Toxic Formulation

- **Non-Pesticide - Nuturell Contains No Conventional Pesticide Chemicals To Regulate**
- **Non-Chemical - Nuturell Surface Shield Contains No Chemicals**
- **Not Department of Transportation Regulated**
- **100% Inert Basic Solution Complete**
- **Not EPA Regulated - No EPA Jurisdiction over Non-Toxic Formulated Products**
- **EPA - Requires No Data Submission, Nor any Data Matrix For Non-Toxic Formulated Products**
- **Not FDA Regulated - No FDA Jurisdiction over Non-Toxic Formulated Products**
Conclusion

CHEMICAL KILL vs MECHANICAL KILL

CHEMICAL KILL – A method used to apply a liquid substance over a surface that smothers and suffocates a viral or pathogen; using a chemical substance such as bleach or Quaternary ammonium compounds that has limited time of efficacy.

As long as the substance remains in a liquid state it can be effective in preventing reproduction. Reproduction is referred to as replication. **Chemical substances must be regulated due to the harmful effects to the environment and human exposure.**

MECHANICAL KILL – A method designed to penetrate the outer membrane of a viral or pathogen causing it to die and prevent any possible replication.

NUTURELL is a liquid product that effectively utilizes a mechanical kill that keeps on killing the viral or pathogen for a specific period of time. Currently the product lasts 30 days except in high traffic areas. 14 days in high traffic areas is the current tested period.

How NSS With Silver Technology Kills Pathogens

First Line of Defense ~ A crystalline Barrier Nuturell has designed a natural mechanism within the formulation that creates a positive crystalline barrier that draws the microbial life forms to itself and punctures the cell wall that will cause the pathogens to bleed out and die; this process is considered a mechanical kill.

Second Line of Defense ~ Silver Technology Nuturell's Silver technology will block the bacterial respiratory system and thereby destroy the energy production of the cell. In the end, the bacterial cell membrane will burst, and the bacteria will be destroyed; another form of a mechanical kill.

Description Steps of Pathogen Death

- 1) The Silver Ions (Ag+) bind to the pathogens cell wall; blocking transportation of RNA to and from the cell.
- 2) Silver technology attacks the respiratory system of the pathogen; destroying the energy of production.
- 3) Within the cell wall of the bacteria the silver technology terminates all cell division which prevents pathogen replication.

DETAILED EXPLANATION

The Nuturell product is composed of Silver Nano's, Inert Salts, Water and an Inert Charged substance that forms a protective shield that maintains an efficacy that keeps on killing until the inert charged substance is worn down.

White Glove Sanitation Chemicals Inc
356 E Irving Park Rd
Wood Dale IL 60191
630-766-7466

Thank you for the opportunity to introduce ourselves to you.

White Glove Sanitation has been in business for over four decades, as a small business that my parents started. It has been my passion to continue my parent's legacy and concern for public safety by exceeding their expectations and becoming one of the top antimicrobial companies in the world. Starting with janitorial services and expanding into sterilizers, disinfectants and antimicrobials, White Glove Sanitation and Chemicals is one of four major companies in the U.S. and Mexico that handle food safety.

Our hand sanitizers are a Benzochlorite based solution. Our hard surface disinfectant solutions are Quaternary Ammonium based solutions. Both products were originally formulated to be used as Antimicrobial Solutions which we, along with other companies, have used to sanitize equipment used in commercial meat and produce plants for many years. The Antimicrobial Solutions were originally formulated for this purpose, they are virtually tasteless and odorless and safe to use around children, food and pets. They have both been proven to kill Human Corona, SARS, and many other virus's, germs and bacteria. All our sanitizing solutions are liquid based and do not contain alcohol or gels. The main reasons for this is that alcohol will evaporate and can damage your skin and some surfaces over time. With gel-based sanitizer's, the germs can get trapped in residual gel on the skin surface allowing them to be easily spread. Both the Benzochlorite and Quaternary break down the proteins in the fatty layer surrounding the virus and/or bacteria allowing the solution to kill the microbes.

We take pride in our products and in helping the communities we serve. We have made multiple donations to Chicago Police & Fire Departments, hospitals and nursing homes. We truly believe it would be beneficial to you to introduce this product into the services you provide.

As of February 2021, we are excited to announce a new line of products in which we are incorporating Nuturell Surface Shield. Nuturell is the FIRST and ONLY product White Glove has ever teamed with. This is not only because of the integrity and quality of the product but of the team involved. We have worked closely with Nuturell to formulate products which not only sanitize, but also provide a 14-day shield on hard surfaces and as a hand sanitizer it will last 12-14 hours after 48 times hands being washed against Human Corona, SARS, and many other virus's, germs and bacteria.

Thank you for your time, we look forward to hearing from you.

Regards,

Roger Dickens II

Roger Dickens
President, White Glove Industries
356 E Irving Park Road
Wood Dale, IL 60191

Mr. Dickens:

Hello and hope that you and your family are doing well. I just wanted to drop you a note telling you how much we appreciate the materials you had shipped to the state. Although we still have some product at our warehouse, because of their quality and effectiveness, their demand is quite high and I am sure that we will be contacting you soon. I can't help but think that with your help and assistance, West Virginia is a leader in the Nation in combatting the COVID-19 pandemic. You made a great impression on my staff and the Secretary and you have made a lifelong friend in West Virginia.

Please let me know if there is anything that we can do for you and again, thank You.

To Whom it may concern:

White Glove Sanitation introduced the state of West Virginia to their products during the COVID-19 pandemic. These products were key to help the state of West Virginia during a time of need. These products are not only 100% effective, but they are also nontoxic to the citizens that are using them. Mr. Dickens has created a product that is easy to use and effective in fighting the spread of unwanted pathogens. This product has been shipped and used across all 55 counties in the mountain state with no adverse effects or reactions. Mr. Dickens has played a key roll in his home states fight against COVID-19 and has also helped save the lives of countless people by giving us a product that can help keep people safe without worry or harmful chemicals or reactions. In addition, the countless applications of White Glove Sanitations products, we have implemented these products into our day-to-day operations within our organization. Members of the West Virginia Army and Air National Guard use these products everyday in facility decontamination as well as shipment decontamination to ensure that every opportunity to keep the spread of pathogens controlled is taken.

Nuturell, Scientifically Proven and 100% Natural, Kills Coronavirus on Surfaces for 14 Days With One Application

AP NEWS

PRESS RELEASE:

Nuturell, Scientifically Proven and 100% Natural, Kills Coronavirus on Surfaces for 14 Days With One Application

March 16, 2021

BOERNE, Texas--(BUSINESS WIRE)--Mar 16, 2021--

Nuturell has formulated an unparalleled 100% natural liquid surface shield that kills 99.9% of Coronavirus, mold, fungi, algae and other pathogens for 14 days after only one application.

Nuturell creates a non-toxic “green” barrier over hard and soft surfaces. It has the consistency of water, no smell, no scent, dries clear in 30 seconds and cannot be washed off. EPA-accredited **Sanders Laboratories** found that Nuturell kills pathogens on interior and exterior surfaces and fabrics for 14 days.

This first-of-its-kind product is available in large totes to businesses and in consumer-sized sprays and wipes through www.nuturell.com.

Current customers include White Glove Sanitation, which services the military, and Medivolve, a publicly traded company.

*How **Nuturell** Works*

Traditional disinfectants use various poisonous chemicals, resulting in a “chemical kill” that is harmful to humans, animals, and plants.

Nuturell’s proprietary “green” surface shield technology converts into an invisible coat of stabilized silver ions, which “mechanically” kills pathogens.

Key Markets

- Offices, hospitals, warehouses, schools, hotels, public buildings. Nuturell's 14-day efficacy against Coronavirus with one 30 second application slashes sanitizing costs.
- Consumers who want a safe, toxic-free home with a cost-effective "green" product.

Endorsements

"As a medical director at nursing facilities with COVID-19 patients, I love being able to both cleanse and protect myself quickly and easily with a non-toxic silver-based anti-microbial compound like Nuturell. I spray it on my hands and clothes, stethoscope, and lab jacket."

Jay Harms, MD

"Nuturell is the gold standard for a safe and natural surface protection created by science. The proof is in the data in which the careful embodiment of natural components, while being 100% nontoxic, are remarkably effective despite containing no chemicals."

Annabelle Manalo Morgan, PhD, Cell and Developmental Biologist

"We did some serious research on Nuturell Surface Shield and found there was simply nothing like it ever made, totally "green" and kills 99.9 % of all pathogens. White Glove has incorporated Nuturell in all of our product lines."

Roger Dinkens, CEO, White Glove Sanitation

- EPA Establishment Number 97456-DE-1
- Green Science
- Nanotechnology
- Environmentally Safe
- 14 Day Efficacy against Coronavirus and viral pathogens
